

AGENT BOARD

LOCAL MAC APP

Your agents. One clear view.

The local menu bar and workstream board for Claude Code and Codex. See what is running, what needs you, and what to pick up later.

LESS TAB HUNTING. MORE MOMENTUM.

Spot the signal

Find Working, Your turn, and Check me.

Keep the thread

Link resumed sessions and star follow-ups.

Own “done”

Review suggestions; mark completion yourself.

Choose how to install

PUBLIC GITHUB

OPTION 1 · DOWNLOAD

Ready-built Mac app

github.com/stellassx94/agent-board/releases

Get the latest Apple Silicon ZIP · Unzip and place the app

OPTION 2 · BUILD YOURSELF

Build from source

github.com/stellassx94/agent-board

Clone the repo · Run `sh macos/build.sh` · Place the app

Required before first use: System Settings → Privacy & Security → Accessibility → add Agent Board and switch it on. **“Open Anyway” is separate.**
Apple Silicon · macOS 13+ · Build needs Xcode tools + uvx.

YOUR 10-MINUTE MISSION → Find a session, star a follow-up, link a resume, mark done. Tell us what felt confusing.
